Volunteers Needed for Brain Imaging Research Study

Researchers in the UCSF Department of Radiology & Biomedical Imaging are looking for volunteers to participate in an imaging study on a 3T MR scanner. There will be no direct benefit for participating, however, this study will help researchers learn and develop more imaging techniques.

You may qualify for the study if you are:

- *At least 18 years of age*
- Qualified participants will have a one-hour 3T MRI scan at the UCSF Mission Bay Campus, Byers Hall

Please contact the study team if you are interested in the study or would like more information. You can reach out to Wendy Ma (wendy.ma@ucsf.edu).
